RBM WARRANTY

General terms and conditions

Flokk's warranty covers all RBM products against material and manufacturing faults and defects from the product's production date. The warranty covers any necessary spare parts. Labour and transport costs are not covered. Wear and tear must be expected from normal use and are not covered by the warranty. Unless otherwise specified, the maximum weight for users of chairs is 110 kg. The warranty is conditional on the chair/table and fabrics/leather undergoing normal cleaning.

Flokk provides a 5 year warranty for all RBM chairs and tables that are in normal use for up to 9 hours per day. Please also see the general warranty terms and conditions.

Maintenance guide

Care of Fabric Upholstery: Regular vacuum cleaning is recommended. Marks and stains should be removed with a proprietary cleaner.

Care of Leather Upholstery: Wipe with a slightly damp cloth and gently rub dry. A good proprietary hide food should be applied at least once a year and more often if the leather is in a dry atmosphere or close to a heat source.

For laminated table tops and unupholstered surfaces on chairs, clean with a soft, damp, non-abrasive cotton cloth and a mild liquid detergent.

For additional maintenance advice please contact our customer service team.

If the fabrics in the Standard, Curated or Extended collections are not what you are looking for, please contact Customer Service, Flokk A/S. When choosing Special or Customer specified fabric/leather the general warranty terms and conditions are still valid, except for the upholstery which will be without any warranty. This does not affect your rights and obligations under local law. Customer specified fabrics/leather can only be used following approval by Flokk.

An EPD (Environmental Product Declaration) is a document that summarises a product's environmental performance. An EPD is based on a life cycle assessment (LCA). The requirements for how an EPD is to be made are specified in the ISO 14025 standard. These standardised methods ensure that environmental information can be compared product by product, regardless of manufacturer, region or country.

The GREENGUARD Gold Indoor Air Quality Certification Program gives assurance that products designed for use in office environments and other indoor spaces meet strict chemical emissions limits, which contribute to the creation of healthier interiors.

* The Möbelfakta certificate does not include the dark stained oak 3D veneer shell.

RBM TABLE TOP COLLECTION

RBM Table Top Collection consists of 24 mm laminate table top and 22 mm melamine table top - both with 2 mm thick shock absorbing ABS edges.

Table tops in high pressure laminate (HPL) are highly resistant, hygienic and a durable solution. It consists of several layers of special decorative coloured paper or real wood veneer, which is impregnated with heat-treated synthetic resins. The layers are pressed together using heat and high pressure. The table tops also have certain heat-resistant properties. The robust surface requires no maintenance.

A melamine table top is a durable solution that requires no maintenance. The core of the melamine top consists of chipboard, onto which melamine foil is glued. The surface is durable and offers scratch- and heat-resistant properties.

For both laminate and melamine tops: Clean with a soft, damp, non-abrasive cotton cloth and a mild liquid detergent.

Other table solutions, price and delivery on request.
